ABOUT ME

I am Lathitha Kunana a Web developer and UI/UX designer. Web development is a skill I learnt at Codetelligence on the year 2022, I started off clueless about what web development is but as days went in started learning more and more about Web development. Got some projects under web development and I completed all of them. The more I worked the better I became,, Today I'm one of the best only because of consistence and determination

Ui/Ux design is my strongest skill because it's been within me since a young age, from drawing anime to building houses with match sticks. the turning point is when I got introduced to figma and photoshop. It improved my designing skills humongously.

I am a very Focused and Determined person and I really enjoy what I do and by the feedback I get back from my clients I can tell they love my work too.
